### Brian McGary Named to Top IT Role at Mack

STATESVILLE, N.C. (Feb. 7, 2017) – Mack Molding, a leading custom plastics molder and supplier of contract manufacturing services, announced today Brian McGary, a seasoned information technology professional with more than 15 years of experience, has been appointed director of information technology, reporting to President Jeff Somple.

“Located in our Statesville, N.C., location, this new position represents an exciting opportunity to further tie the Mack North and South teams together in our mission to achieve Total Customer Satisfaction,” Somple said. “From systems administration to managing IT security and operations, as well as implementing significant infrastructure projects, Brian has broad expertise in building dynamic enterprise solutions. In a competitive marketplace, he will play a key role in our continued success by bringing scalability, agility and efficiency to our business systems.”

Prior to joining Mack, McGary most recently was service delivery manager at Acrowire in Charlotte, N.C., where he played a key role in Microsoft SharePoint and custom application development solutions. He previously served in positions of increasing responsibility at Muzak and Polypore International. Brian has an associate’s degree in liberal arts with an emphasis on business administration and computer technology from Rowan Cabarrus Community College in Salisbury, N.C., as well as a bachelor’s degree in management information systems from Queens University in Charlotte, N.C.

McGary will be responsible for implementing cutting edge solutions to advance the Company’s short- and long-term technology plans with a focus on increasing competitiveness, compliance and security. He will work closely with all levels of the organization, ensuring the proper technology is in place to support mission critical business operations.

#### About Mack Molding
