

**FOR IMMEDIATE RELEASE**

**Meritech Helps Cleanroom and Lab Facilities Improve Employee Hygiene SOPs with Fully Automated, Clinically-Backed Handwashing Systems**

**GOLDEN, CO** – Meritech, manufacturer of the world’s only fully-automated, touch-free handwashing systems will be exhibiting at the MD&M West in Anaheim Feb. 7-9 at booth # 2469 — with a variety of automated handwashing systems onsite so attendees can experience our technology-based approach to employee hygiene. Meritech offers a full line of products designed to meet stringent standards and regulations related to employee hygiene and bioburden control.

Five CleanTech systems for cleanroom and lab facilities, include:

- CleanTech 500EZ with optional integrated air curtain
- CleanTech 500C
- CleanTech 2000s with optional integrated air curtain
- Cleantech 4000S with optional integrated air curtain

View a video of the new air curtain in action [here](#).

All CleanTech automated handwashing systems deliver an effective 12-second wash and rinse cycle, removing 99.98% of dangerous pathogens from hands and reducing bioburden. Meritech products use 75% less water, require less soap/sanitizer, and reduce discharge waste, compared to equivalent manual handwashing.

All Meritech products are designed and manufactured in Golden, Colorado. The company ensures that your equipment is always effective by delivering best-in-class, proprietary chemicals and providing no charge, onsite scheduled calibration by its team of Service Engineers.
