Tuesday, January 24, 2017

**Moretto Attending PLASTEC West, February 7-9, 2017**

**Columbus, OH, USA** – Moretto USA LLC. announced that it will be exhibiting at the upcoming PLASTEC West trade show being held in Anaheim, California, USA from February 7<sup>th</sup> – 9<sup>th</sup>. Moretto will be located in booth 3701.

During the show Moretto will be highlighting a variety of their industry leading resin automation solutions including:

- **DVK Krystal™** - A volumetric Masterbatch dosing system with a unique transparent hopper design.
- **DGM Gravix™** - Featuring a 25ms reaction time and designed specifically for dosing applications with an unparalleled dosing precision of 0.001%.
- **X Dryer™** - A premium performance dryer, featuring adaptive airflow, double-bed technology, a stable -75°C dew point, and no requirements for compressed air or cooling water.
- **OTX™** - An exclusive drying hopper designed with a special geometry and thermodynamic properties that allow for optimal drying performance and requires 40% less drying time as compared to conventional technologies.

Members of the Moretto USA team will be available at the show to meet with customers to explain how the companies engineered solutions are allowing customers in more than 60 countries realize significant energy consumption savings and system optimization for all their resin automation and process cooling requirements.
