

## Axon Features Its Latest Mid-Range Shrink Sleeve and Tamper Band Applicator at WestPack

*For line speeds from 100 up to 150 cans or bottles per minute, the EZ-150SL is unequalled in terms of performance, ease of operation, ruggedness, build quality, and price. (Axon WestPack Booth #5031)*

**RALEIGH, N.C., February 1, 2018** – [Axon](#), a product brand of [ProMach](#), showcases at WestPack, February 6-8 at the Anaheim Convention Center Anaheim, Calif., its top machine for tamper banding and shrink sleeving at line speeds ranging from 100 to up to 150 cans or bottles per minute. The [EZ-150SL](#) represents the latest price and performance breakthrough from Axon in the mid-line speed range. This automation solution delivers value to West Coast manufacturers and co-packers in the food and beverage, pharmaceutical, and nutraceutical industries. (Axon WestPack Booth # 5031)

The Axon EZ-150SL is a mandrel-style shrink sleeve applicator. It features a stainless steel frame for long service life and the latest in servo control for fast, accurate, and trouble-free film feeding and cutting. Axon's axial knife mechanism ensures long blade life for low cost of ownership. A color touchscreen human machine interface (HMI) makes operation easy and intuitive. This HMI was designed for today's diverse workforce – a generation comfortable with on-screen navigation. The EZ-150SL is ideal for full body sleeve, full body sleeve over cap, multipack, tamper evident band, and label panel applications. A [video](#) of the unit is available on the Axon website.

Customers may use such films as PVC, PETG, OPS, and PLA. For the EZ-150SL, Axon designed the ThermoFlow heat tunnel. ThermoFlow is an innovative, compact, self-contained shrink tunnel that features a 15-PSI low pressure steam generator and condensate collection system. Because it is low pressure, packaging operations do not need special licensing or certifications that are required for high pressure boilers.

Every WestPack attendee interested in the latest innovations for line speeds ranging from 50 to 800 cans or bottles per minute should stop by booth #5031 to talk with product and sales personnel about Axon's solutions for:

- [Shrink sleeve label applicators](#)
- [Tamper evident band applicators](#)
- [Multipack sleeve applicators](#)
- [Heat shrink tunnels](#)
- [Stretch sleeve label applicators](#)

### **About Axon**

Axon is a leading manufacturer of fully automated, heat shrink labeling, tamper evident banding, and stretch sleeving equipment. With more than 30 years experience delivering products and solutions that are affordable, reliable, versatile, and easy to use, Axon sets the standard for technology development and customer value within the industries it serves. Visit Axon at [www.AxonCorp.com](http://www.AxonCorp.com).

### **About ProMach**

ProMach is a family of best-in-class packaging solution brands serving manufacturers of all sizes and geographies in the food, beverage, pharmaceutical, personal care, and household and industrial goods industries. ProMach brands operate across the entire packaging spectrum: filling and capping, flexibles, pharma, product handling, labeling and coding, and end of line. ProMach also provides Performance Services, including integrated solutions, design/build, engineering services, and productivity software to optimize packaging line design and deliver maximum uptime.

ProMach designs, manufactures, integrates, and supports the most sophisticated and advanced packaging solutions in the global marketplace. Its diverse customer base, from Fortune 500 companies to smaller, privately held businesses worldwide, depends on reliable, flexible, technologically advanced equipment and integrated solutions. ProMach is headquartered near Cincinnati, Ohio, with manufacturing facilities and offices throughout the United States, Canada, Mexico, Brazil, Europe, United Arab Emirates, and China. For more information about ProMach, visit [www.ProMachBuilt.com](http://www.ProMachBuilt.com).
